File(s): Group 5

Enclosed are the new store counts for Group 5.

We have acquired 7,435 stores in Group 5.

With Groups1-3 (8,278) we have a possible total sample of 15,713.

I say possible because sometime stores change status on STARS and we might lose them in the sample. Our sample is large enough that I don't forsee this this to be a problem.

Because of the additional stores, processing has informed me that the list will not be available until Tuesday.
